

LET'S RECAP!

INTERMEDIATE ENGLISH

English for Information Technology

IT is used in businesses and is basically the backbone of the commercial world at the moment. English is the international language of trade currently, and so the two are interlinked in terms of being able to operate many systems. Many programs are produced in the US or they are made in English in other countries, and so English is essential for understanding them. It is an international language of communication and so allows communication via electronic means in a single language, which avoids subsequent confusion.

English for Information Technology

Why is English important in technology careers?

In order to stay up-to-date with the latest technology, understanding and communicating well in one of the world's most widely-used languages, English, is pivotal.

What are the benefits of mastering English for Information Technology students?
